TECHNICAL SKILLS

Cloud Platforms

AWS (EC2, S3, RDS, CloudWatch, Lambda) • Azure • Google Cloud Platform (GCP) • Firebase • Cloud CDN • Amazon CloudFront • Hybrid Cloud Models

DevOps & Infrastructure

Docker • Containerization • Virtualization • CI/CD Pipelines • Bash Scripting • Unix/Linux • Apache • Git / GitHub • Agile / Scrum

Languages & Frameworks

Python (OOP) • JavaScript / TypeScript • React / React Native • Node.js / Express • FastAPI / Django • HTML5 / CSS3

Data & AI

MongoDB • Firestore • TensorFlow • OpenCV • Data Preprocessing Pipelines

Design

Figma • UI/UX Prototyping • Framer Motion

COURSES & CERTIFICATIONS

Cisco AWS Networking

Level 1, 2 & 3 (College Program)

AWS DevOps

Level 1 & 2

Stanford AI / Deep Learning

Level 1 & 2

Cloud Computing Core, IBM

Docker, Hybrid Cloud, Containerization, Virtualization

Figma UI/UX, Udemy

Meta Full Stack Developer

Specialization, Coursera

EDUCATION

B.Tech, Computer Science & Engineering

Jyothi Engineering College, Thrissur
2020 – 2024

Full-stack engineer and cloud/DevOps practitioner with 3+ years across production systems at Cisco, Flipkart, and Codelattice, spanning SDE roles, backend infrastructure, and CI/CD delivery. Experienced in AWS, Azure, and GCP deployments, containerized services, and high-traffic applications, including a PWA that processed 1.2 million Firestore reads and 2,275+ authenticated coupon scans at 100% uptime. Led a Government of Kerala supported mobile app initiative and holds a Meta Full Stack Developer Specialization. Looking to bring cloud infrastructure depth and full-stack delivery experience to a DevOps engineering role at UST.

PROFESSIONAL EXPERIENCE

SDE 2 (Software Development Engineer)

Mar 2026 – Present

Cisco Systems India Pvt. Ltd.

Bengaluru

SDE 1 (Software Development Engineer)

Mar 2025 – Mar 2026

Cisco Systems India Pvt. Ltd., Cessna Business Park

Bengaluru

Intern

Jan 2025 – Mar 2025

Cisco Lab

Jyothi Engineering college

- Progressed across a 2-year tenure from Intern to SDE 1 to SDE 2, taking on increasing ownership of backend services and internal tooling within a large-scale networking and cloud infrastructure organization.
- Built and maintained backend services and internal automation tooling using AWS (EC2, Lambda, CloudWatch) and Apache-based web infrastructure, supporting internal platform reliability and observability.
- Contributed to CI/CD pipeline improvements and containerized deployment workflows, collaborating with cross-functional teams on release engineering and infrastructure automation.
- Worked within Agile delivery cycles on production-grade systems, participating in code reviews, on-call rotations, and incident triage as ownership increased with seniority.
- Mentored incoming interns during the SDE 2 phase, onboarding them to internal infrastructure tooling and deployment practices.

Software Engineering Intern

Mar 2024 – Sep 2024

Flipkart

Bengaluru

- Earned the internship offer by placing in a Flipkart-hosted hackathon, and joined the Flipkart app engineering team for a 6-month full-stack internship.
- Contributed to full-stack development of features on the Flipkart consumer app, working across frontend and backend service layers.
- Deployed and managed services using Microsoft Azure and Google Cloud Platform (GCP), gaining exposure to multi-cloud infrastructure patterns at scale.
- Collaborated with senior engineers on performance optimization and feature rollout for high-traffic e-commerce workflows.

Cloud Operations Intern

Sep 2023 – Mar 2024

Codelattice Digital Solutions Pvt. Ltd.

Calicut

- Entry-level internship focused on cloud operations, supporting infrastructure monitoring and MERN-stack application maintenance.

- ▶ Worked hands-on with AWS core services, including EC2, RDS, S3, and CloudWatch, for provisioning, storage, and monitoring of cloud workloads.
- ▶ Wrote Bash and Python scripts for operational automation across Unix-based environments.
- ▶ Supported the MERN stack development team with debugging, environment setup, and deployment tasks.

Lead Developer (Technical Trainee)

Aug 2025 – Jan 2025

Rajiv Gandhi Centre for Biotechnology, IAN-2025 (ian2025.in)

Thiruvananthapuram

- ▶ Built and deployed a high-performance Progressive Web App (PWA) managing on-ground logistics for an international neuroscience conference, achieving 100% system reliability during peak hours.
- ▶ Automated event workflows: handled 1.2 million Firestore reads and a digital authentication system that processed 2,275+ food coupon scans with zero manual errors.
- ▶ Maintained secure operational access structures to isolate sensitive logistical workflows and conference parameters during execution.
- ▶ Developed Python automation routines to integrate multiple data streams, applying OOP principles throughout the codebase.

Frontend & DevOps Engineer (Contract)

Apr 2026 – Jun 2026

Threadpath Collective (threadpathcollective.ca)

Remote

- ▶ Engineered a custom, responsive inventory tracking interface using React and Framer Motion, applying dynamic polar coordinate math for precision layout and typography alignment.
- ▶ Resolved edge-case layout overflows on mobile devices by dynamically scaling SVGs relative to viewport width, preventing text collision during high-density UI interactions.
- ▶ Managed production deployments using AWS Cloud Functions and Amazon CloudFront (CDN) for low-latency global content delivery and fast page loads.
- ▶ Diagnosed and resolved CDN caching discrepancies across custom domains, ensuring seamless live updates.

TECHNICAL PROJECTS

ETHIndia, ETHMumbai & ETHKochi Websites

Open-Source Contributions

- ▶ Contributed to the development of official event websites for ETHIndia, ETHMumbai, and ETHKochi, major Web3 and blockchain hackathon events, building responsive frontend components and improving site performance.

Ente Naddu App

Government of Kerala Initiative

- ▶ Co-developed a Government of Kerala supported mobile app for school students of Sarvodayam VHSS Arayampadam, leading a 5–6 month development cycle covering requirements, architecture, and delivery.

Automated Review & Attendance System

- ▶ Built an end-to-end ML pipeline using Python and OpenCV for facial-recognition-based attendance logging, achieving 92% accuracy and reducing manual administrative overhead by over 95%.

Web-Based CSV to JSON Utility

- Developed a high-performance client-side developer tool with zero data latency and complete data privacy, reflecting a DevOps mindset of building reliable, reproducible developer utilities.
